Detail Introduction :

Security VOID Hologram Labels

This labelstock has instant tamper-indicating properties that reveal a 'VOID' message upon removal of the label from the substrate. Typical applications include automotive and electronic component labelling, security seals, warranty and asset tracking identification. It is approved by leading automotive companies for interior and exterior use and widely employed by electronic, appliance and telecommunication manufacturers.

Coated with high performance acrylic adhesive, the labelstocks offer initial high tack and good adhesion to textured and high and low surface energy substrates, even at low temperatures.

The compact size of the 'VOID' text makes it suitable for all shapes and sizes of labels and it accepts conventional ink and thermal transfer printing with resin and wax/resin ribbons. Available in matt silver, bright silver, clear, white and black, we can also provide custom 'VOID' text, logos and colours. On the basis of encrypting laser Identification,then print the words and pictures on the bottom of the Identification.When remove the lable from the products,the words and pictures transfer and adhensive on the products and strengthen the difficulty of copying.

Product No.	CCVOIDH038
Facestock	Hologram materials
Thickness	20?m
Adhesive	Acrylic based adhesive
Liner	White glassine paper/ White Kraft paper
Color	Hologram rainbow color

Serice Temperature	-30?-150?
Application Temperature	10°C
Printing	Full Color
Features	Tamper-indicating properties
Size	Customized
