Detail Introduction :

Beer Bottle Labels

The application of self adhesive labels in beer industry provides opportunities to large beer manufacturers to perfect products image. However, the restriction of traditional metalized paper is big challenges.

Leading beer manufacturers are rapidly turning to self adhesive films. Super clear face, clear adhesive, and high tensile release, becomes a new trend of elaborate beer labels, as well as the quality achieved by labelstocks suppliers. Meanwhile, bottle recycling makes washable labels become a main topic in present label industry.

Product No.	CCBL020	CCBLP020	CCBLR020
Facestock	Co-extruded Polypropylene film 0.0020 inches	Co-extruded Polypropylene film 0.0020 inches	Co-extruded 0.0020 inches
Special Coating	improved ink adhesion	a white base paper	improved ink
Adhesive	Permanent acrylic adhesive	Permanent acrylic adhesive	Removable a
Liner	A bleached glassine white liner 0.00208 inches	1.5 mil durable Polyester liner N/A	A bleached g 0.0025 inches
Color	Transparent	Transparent	Transparent
Service Temperature	-20°F-200°F	-65°F-200°F	0°F-200°F
Application Temperature	23°F	38°F	40°F
Printing	Full Color	Full Color	Full Color

Features	This product has excellent moisture resistance and good diecutting and dispensing characteristics. Not recommended for thermal transfer printing.	Semi-rigid applications and flexographic printing.	This product has excellent moisture resistance and good diecutting and dispensing characteristics. The adhesive is suitable for most substrates.
