Hologram Tamper Proof VOID sticker

What is Tamper Proof Void Sticker?

The tamper-proof void sticker is made of polyester or laser film, with a white or other color appearance and a unique adhesive. If someone uncovers the label, it will leave traces of words such as "void," "unsealed," "opened," which indicates that the brand has been uncovered, moved, or pasted without permission. Therefore, it is widely used in other anti-theft and anti-counterfeiting aspects such as commodity quality assurance and logistics.

Tamper-proof VOID sticker is a symbol of identity. Through it, we can quickly identify whether it is genuine. Although this kind of label is rarely heard in our lives, it is applied everywhere. What kind of tamper-proof sticker is the void anti-counterfeiting title?

A tamper-proof Void sticker is an uncovering (uncovering and leaving words) anti-counterfeiting material, preventing unauthorized uncovering, moving, and re-pasting. It is mainly used for logistics labels, anti-theft seals, and seals. The tamper-proof void sticker has the functions of "damage upon uncovering" and "void upon damage." As to achieve the purpose of fidelity and provide the process of automatic inspection. The material-based tamper-proof void sticker, open void anti-counterfeiting material, also known as a hollowed-out counterfeiting font, is a suggestive self-adhesive anti-counterfeiting material whose base material is polyester or plastic film. Including opening the hollowed-out text and images; When it is opened, it is layered, and the contents hidden between layers are flashed, preventing unauthorized opening, moving, and re-pasting. It is mainly used for logistics labels, anti-theft sealing labels, and seals; Layering is used mainly for code anti-counterfeiting labels. If the titles produced as the base material are lifted, preset words or images will be displayed from the surface material.

Features of the Tamper Proof Void Sticker

(1) The surface material can be selected for double-coated paper, OPP, PE, PET, PO, etc., according to the actual needs of printing mode and surface of pastes. The base material can be made into white, dull, light silver, or other colors and can also be made into color effect.

(2) The surface material can be coated according to the printing method. The treated substrate surface has good printing and printing effect, chemical reagent resistance, and abrasion resistance. It can save printing cost, reduce carbon tape and reduce printer loss; printing by offset, UV, gravure and other printing methods can achieve good printing effect

(3) When the label is torn from the surface of the adhesive, the preset text or pattern of the base material and the void anti-counterfeiting label is separated from the base material and wholly retained on the surface of the adhesive. The torn base material and font cannot be restored.

(4) The preset font in the substrate can be text, pattern, or other unique pattern specified by the customer. The particular edition pattern is adopted to enhance the anti-counterfeiting effect significantly and enhance the corporate image.

When the tamper-proof void sticker is opened, words such as "void, opened" will be left to achieve the purpose of fidelity. It has the characteristics of loss, loss, authenticity, and nonreuse.

Classification for the Tamper Proof Void Sticker

Complete Transfer Tamper Proof VOID Stickers

This kind of void sticker provides excellent prevention against counterfeit, theft, and duplicity. These stickers ensure superior authentication to products and brands employing cutting-edge techniques. The stickers have hidden text and images on the adhesive surface, which leaves an impression on the pasted product in the event of tampering to avoid duplicity and theft. We design these stickers according to the customized demands of clients in distinguished colors, sizes, designs, patterns, and dimensions.

Features:

- Free from tampering
- Easy detection of unauthorized detection
- Prevent counterfeit and theft
- Smooth finish
- Vivacious color pattern
- Excellent product duplicity protection
- Moisture and waterproof
- Attractive design
- Unique identity with imprinted serial number and images

Applications:

- Valuables packaging
- Electronic items
- Home appliances
- Vehicles

- Food items
- Wide range of other applications.

Hologram Tamper Proof VOID sticker

The hologram tamper-proof VOID stickers are used to avoid counterfeiting and brand duplication. The holograms are patterned from optimum grade materials and advanced techniques to provide product brand authentication excellently. These holograms have unique serial numbers or images on the void, which imprinting on the surface even after peeling off. The holograms with VOID text provide excellent prevention from photocopying and scanning.

Features:

- High adhesion
- Protection against counterfeit
- Water & moisture-proof
- Scratch resistant
- Alluring design
- Excellent fragility

Applications:

- Computer cabinets
- Electric meter
- Electronic items
- Home appliances
- Laptops
- Vehicles

- Food items
- Wide range of other applications.

Non-Transfer Tamper Proof Void Stickers

The non-transfer tamper-proof void stickers are suitable for sealing the parcel and carton containing valuables. These labels ensure the authenticity of the packed goods and make the products free from counterfeiting. High-quality materials and cutting-edge techniques are being used in designing these labels to make them tamper-proof. Each invalid title has a hidden word or alterable sequential number which cannot be seen without opening. Once opened, the tape cannot be resealed.

The unique features of these labels are that they show void on the label when tampered with, but the residue on the products.

Hence the product is not damaged. It is helpful for products like electronic goods, mobile cameras, electrical products, and many other applications.

Features:

- Tamper proof
- Non-transferable to the applied object
- High adhesion
- Non-reusable
- Prevent theft and counterfeiting
- Mesmerizing design

Applications:

- Vehicles
- Home appliances
- Electronic appliances

- High-value objects
- Wide range of other applications.

Tamper Evident Void Tapes

With a hidden message on adhering surface, the Tamper Evident Void Tapes find extensive use in brand product Protection and authentication of applications. These void tapes are patterned prudently by the finest grade materials, adhesives, and the employment of sophisticated techniques. Our offered void tapes carrying unique identities provide superior Protection against theft and counterfeit. In case of tampering, void tapes leave behind an imitation to avoid any duplicity and counterfeit.

Features:

- Excellent sealing
- Tamper-resistant
- Prevent theft and counterfeiting
- Cannot be reused
- Smooth finish
- Control unauthorized interference
- High adhesion

Applications:

- Carton packaging
- Electronic appliances
- Home appliances
- High valuable product packaging
- Wide range of other applications.
