

Self Adhesive Battery Safety Warning Labels, Battery Label With Custom Strong Glue

Specifications :

Place of Origin	Shanghai, China
Payment Terms	Credit guarantee, T/T, Western Union, Paypal, Wire Transfer, LC.

Detail Introduction :

Battery Labels

The temperature of battery always raise to high level, so we need special adhesive and special facestock to resist to the high temperature.

Crystal Code's high temperature labels can fully meet the temperature resistance of battery labels to keep the good performance of the stickers on battery with long term.

Product No.	CCHLPI025	CCHLPETG040
Facestock	Polyimide Film(PI)	PETG film
Thickness	0.025 mm 27 g/m2	0.040 mm 35 g/m3
Adhesive	Transparent and permanent silicone modified acrylic adhesives	Transparent and permanent silicone modified acrylic adhesives
Liner	Matte kraft paper 80 g/m2, 0.165mm	Matte kraft paper 80 g/m2, 0.060mm
Color	White, Green, Pink, Black, Blue	White
Service Temperature	-40? ~400?	-30?-250?
Application Temperature	-10°C	-10°C
Printing	Full Color	Full Color
Features	Suitable UV printing and thermal transfer printing. Good performance on metal.	Suitable for Auto labelling It is adaptive to UV printing and thermal transfer ribbon printing.
Size	Customized	Customized
