Scratch Off Stickers

Scratch card print the award on the surface directly, then use the special Scratch card ink cover it accords to the palce of award , customers only need to scratch the palce of award and konw get the award or not,scratch card has some worth. Many companies adopt the anti counterfeiting scratch card to print so that can prevent the lawless elements to forge the adward scratch cards. The function is strengthen the anti counterfeiting of the scratch card so that can guarantee the benefit of themselves and customers. The scratch card as an special bond that has worth, scratch card's anti counterfeiting mode is developing with the anti counterfeiting technology's development, scratch card's anti counterfeiting modes are as following:

1.Security wire anti-counterfeiting

2.Digital security inqury

3.Fluorescent anti-counterfeiting

4.Temperature change anti-counterfeiting

5.Sandwich anti-counterfeiting

6.Flowers anti-counterfeiting

7.Shading anti-counterfeiting and many other multiple anti-counterfeiting technologies.

Application:

Scratch cards is widely used in industries of telecom, IT, catering, supermarketand education. Especially in the telephone cards of telecom, because of its speciality ,the scratch card has become a worthy bond, so the maker's requirements of material, print, password covering and design is higher than other industries, the scartch card is called billing phone password card. In other industrie it is called game cards, internet cards, lottery card, study card and so on.

A scratch card is widely used in the market , it is a promotion way of the manufacturer, merchant to give the customers' feedback and its effect is very good. Adopting of scratch card to promote the products and service is an international popular promotion ways and it has been gradually popularized in mainland China.

The sociality is developing today and the scartch card has gradually changed to the PVC making , increasing the quality of scratch card.

Making scratch card is harder than common printed products, It's usual made by professional anti counterfeiting company or professional print factory.

For the quality of the scartch card's requirements are as following:

1.The content is correct

The content of scratch card must be complete

2.The quailty of printing is good

Scratch card must be printed correct and beautiful, printing quality is also a part of showing the product's image, the print should accord with the print products' requirements;
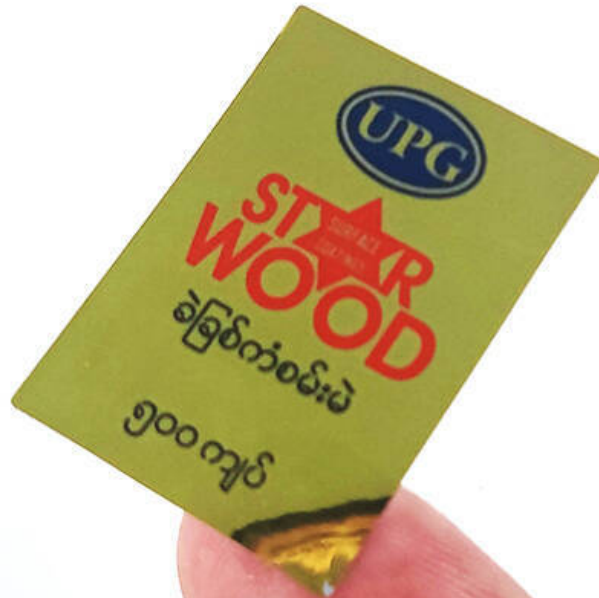

3.Scraping is appropriate

Because it has important information or awards under the scratch card, the scratch coating performance is an important manifestation of the quality of the scratch card, be sure of scratching easily but not be so easy to scartch. If it is easy to scartch, the scartch card is easy to wear off during the link of producing and circulation and affect the use of it.

4.Anti-counterfeiting measures are effective

Scartch card should consider the function of anti counterfeiting, be sure of the anti counterfeiting measure adopted can prevent others from coping at a certain time.
