Detail Introduction :

Tire Sulfuration Labels

With big progress of engineering construction and rigid demand of family cars, automobile industry gets a rapid growing into the 21st century. As a consumable part of automobile, tyre industry gain from it.

Crystal Code provide the top quality tyre special usage labels Tyre Label which have the following characteristics:

1. Face material: Except elaborate images the face must have good impermeability. We recommend the eco-friendly PP materials.
2. Adhesive: Rough tyre surfaces require aggressive immediate adhesion.
3. Liner: High coat weight adhesive brings many challenges in die-cutting, so the liner must be straight, smooth and its tension must be strong enough for stamping.

Crystal Code has abundant experiences in this field, with wide range products and stable good quality Tyre Label.

Product No.	CCTLS130
Facestock	PETG/PEEK
Facestock thickness	0.13 mm
Liner	Glassine Paper, 0.05mm
Color	Gloss White
Service Temperature	-60?-220?
Features	Suitable for normal barcode printer
Printing	Black

Size

Customized
